

# ABBAclean

BIODEGRADABLE  
SOLUTION

After using  
**ABBAclean**

**CLEANS WALLS, ROOFS, ...**

Ready-to-use product

## ► DESTINATION

**ABBAclean** is a product designed to clean walls and roofs which are encrusted with dirt and micro-organisms. **ABBAclean** is based fungicide, bactericide and algicide vegetable-based active principle

**ABBAclean** is a single-component product which is easy to use and cleanses all kind of materials used in the construction field.

**ABBAclean** can be easily applied with a brush or a spray on a basis of approximately 5m<sup>2</sup> per litre.

**ABBAclean** is the perfect solution to obtain clean surfaces before a decontamination treatment with **ABBAmousses**.

These two products are complementary and their combined action **cleans** surfaces (**ABBAclean**'s cleansing action) and **prevents** from the growth of micro-organisms (**ABBAmousses**'s decontaminating and preventive action).

## ► SCOPE OF USAGE

**ABBAClean** can be used on most surfaces : walls and roofs in need of cleansing.

**Roofs** : terracotta tiles, slates, fibrocement,...

**Walls** : all kind of renderings, roughcasts, stone and brickworks,...

**Others** : patios, monuments, conservatories, paths, benches, tennis courts,...

## ► PRESENTATION

**ABBAClean** is an aqueous product for quick cleaning of surfaces.

**ABBAClean** allows a quick cleaning of materials.

It is advised to use **ABBAClean** before applying **ABBAmousses**.

With its detergent action, **ABBAClean** allows to gain time with a clean surfaces straight after rinsing. To follow, the application of **ABBAmousses** allows the destruction of subsiding invisible parasite germs with its decontaminating power, then its preventive action takes place.

## ► HOW TO APPLY

**ABBAClean** can easily be applied with a spray, a brush or a roll.

**ABBAClean** must be applied onto dry (or slightly damp) and clean surfaces.

Leave **ABBAClean** on for about 4 to 24 hours, then rinse off with a high pressure water system. This operation can be followed by drying the surface with **ABBAmousses** on a basis of 5 m<sup>2</sup> per litre in order to ensure a good decontamination of the materials and also to benefit from its preventive action against micro-organisms.

This treatment can be followed by normal operations like painting only after the surface has been left to dry normally.
