

ABBAClear

Ready-to-use product

- ▶ Eliminates mould and black traces on plaster
- ▶ Eliminates the blue aspect of outside woodwork

▶ DESTINATION

ABBAClear is a product designed to eliminate the black traces which develop because of the presence of mould on materials (inside or outside), and in particular on plaster and rough wood surfaces.

ABBAClear is an added advantage for wood as not only does it free it from micro-organisms but it also gives it back its original natural appearance.

ABBAClear can be sprayed or brushed on, on a basis of 1 litre for 5 m².

▶ SCOPE OF UTILISATION

ABBAClear can be use on a wide variety of surfaces : plaster, paint, grout, interior and exterior coating, plastic, wood...

▶ PRESENTATION

ABBAClear is an aqueous product, its formula associates (cationic and non-ionic agents) acting in synergy with a low level organic acid.

ABBAClear destroys moulds which create the black traces on the walls.

A surface cleaned with **ABBAClear** and then rinsed can be ready for painting.

▶ HOW TO APPLY

Depending on the result sought after : either cleaning or wood restoring, **ABBAClear** is used according to the two following methods :

Cleaning : **ABBAClear** can be sprayed or brushed onto the surface to be treated. Leave **ABBAClear** on the surface for up to an hour and rinse with water and a sponge or a nylon brush for thougher surfaces.

Wood restoring : **ABBAClear** can be sprayed or brushed onto the black or blue surfaces. Leave **ABBAClear** on the surface for 1 to 12 hours, then rinse while rubbing with a sponge or a brush.

According to the essences and the level of contamination of the wood it will take the surface a certain amount of time before it recoups its original natural appearance.

Once dry, the wood can be varnished or stained.

A new application may be necessary in case of a strong encrusting of the mould.

▶ PACKAGING

- 2-litre bottle
- 10-litre bottle
- 25-litre drum
