

ABBAgliss

▶ TO REDUCE THE RISK OF SLIPPING ONTO TILED FLOORS

▶ DESTINATION

ABBAgliss is a product designed to reduce the slippery effect of tiled floors when wet .

ABBAgliss is a very easy to use product which allows to reduce the risks of slipping onto smooth tiles floors when wet .

ABBAgliss can be applied with a brush or a roll or even a spray on a basis of 1 litre for 4 to 6 m²

▶ SCOPE OF USAGE

ABBAgliss is specially designed to be used onto smooth, non-absorbent tiles which become slippery when wet .

ABBAgliss can be use onto interior (I.e : bathroom) and exterior surfaces .

▶ PRESENTATION

ABBAgliss is an aqueous product, its appearance is translucent and thick in consistence .

ABBAgliss create a near invisible micro-porosity on the surface of the tiles .

▶ HOW TO APPLY

ABBAgliss must always be applied onto clean and dry surfaces .

ABBAgliss can easily be applied with a spray, a gun or a brush in a thick and even layer .

ABBAgliss must to be left on the tiles for one or two hours, and then it must be rinsed off with a brush and water .

For an optimum result, a second application is sometimes necessary on certain surfaces .

Avoid projection onto other surfaces which are not meant to be treated such as glass, plastic, metal, bitumen coating, etc...These must be protected .

In the case of projection onto non-absorbent material, wipe off immediately with a tissue and water .

Please note : it is advised to always carry out a test application to check whether the color and aspect of the floor tiles do not change after application
