

ABBA green Flat roofs

Ready-to-use product

► **Against : vegetation and mosses developing
on waterproof flat roofs**

DESTINATION

ABBAgreen-Flat roofs is designed to maintain flat roofs clean and to fight against the growth of vegetation which roots can break through the waterproof layer.

ABBAgreen-Flat roofs is very easy to use does not present any risks for the materials, especially the waterproof ones, from the more traditional ones such as asphalt, bitumen, tarred compound to the more recent ones such as PIB, PVC, elastomer bitumen, etc...

ABBAgreen-Flat roofs can be sprayed on a basis of 1 litre per 8 to 10 m².

PRESENTATION

ABBAgreen-Flat roofs is an aqueous preparation free of components which could harm the materials. Also it will not lead to side effects.

ABBAgreen-Flat roofs destroys the leaves but it is danger free for the seeds.

ABBAgreen-Flat roofs is easily biodegradable and it disappears rapidly once it has worked its action on the vegetation. **ABBAgreen-Flat roofs** also destroys mosses, algae, lichens.

HOW TO APPLY

ABBAgreen-Flat roofs can be sprayed. The vegetation will start to disintegrate one to two days after spraying, and it will be totally destroyed three or four weeks later. Nothing will be left of **ABBAgreen-Flat roofs** as it only acts on the leaves and as it is degradable.

ABBAgreen-Flat roofs will not have any action on the plants which might develop afterwards.

Additional local applications might be needed in the eventuality of vegetation which has not been treated well enough.

ABBAgreen-Flat roofs is a non-selective product : it will work on ALL type of vegetation.

It is therefore advised to take precautions and to protect the plants which are not targeted to be destroyed.
