

# ABBArouille

Ready-to-use product

- ▶ **Converts rust**
- ▶ **Creates a protective film before painting**

## DESTINATION

**ABBArouille** is a product designed to block off rust and to convert it in a stable and inert film.  
**ABBArouille** is very easy to use on metal surfaces before painting. Its simple reacting function makes paint last longer.  
**ABBArouille** can be applied with a spray or a brush on a basis of 1 litre for 5 to 10 m<sup>2</sup>.

## PRESENTATION

**ABBArouille** is an aqueous, slightly thick and acidic product.  
**ABBArouille** acts by chelation : it blocks off the rust and allows the creation of a protective screen on the interface ferrous surface/paint coat.

## HOW TO APPLY

Remove rust and calamine with a metallic hard brush.  
 Once this is done, **ABBArouille** can be applied evenly with a brush. The reaction of the product is the quick formation of a black coating on the treated surface.

Leave **ABBArouille** on the treated surfaces.

Once totally dry, rinse off with a wet sponge in order to eliminate the eventual excess of surfactant.

Finally, when **ABBArouille** is totally dry, finish off by applying paint; this can be done up to a few weeks following the **ABBArouille** application.

## PACKAGING

- 2-litre bottle
- 10-litre bottle
- 25-litre drum
