

# ABBA stop Plus

Ready-to-use product

## ▶ Long lasting invisible waterproofing of porous materials

### ▶ DESTINATION

**ABBAstop Plus** is designed to waterproof on walls and roofs' porous surfaces.

**ABBAstop Plus** prevents water (liquid form) to penetrate into the material while leaving the surface free to breathe.

**ABBAstop Plus** offers a long lasting protection.

**ABBAstop Plus** is very easy to use with a spray or a brush on an average basis of 1 litre for 3 to 5 m<sup>2</sup> depending on the absorption level of the surfaces. Please note that the product must be generously applied.

### ▶ SCOPES OF USAGE

**ABBAstop Plus** can be applied onto porous surfaces :

- Roofs : tiles, terracotta, fibre cement or slate sheets, other naturally absorbent surfaces,...
- Wall : rendering, stonework, brickwork...

### ▶ PRESENTATION

**ABBAstop Plus** is a colourless solvent product containing an oligosiloxane base.

When applied onto materials, **ABBAstop Plus** ensures an invisible and long lasting protection against water without the formation of film.

**ABBAstop Plus** allows the surface to be more resistant in time to frost and dirt.

**ABBAstop Plus** is exclusively designed to be applied onto vertical or slanted surfaces and it is not suitable for using onto horizontal surfaces (patios, floor tiles...), for this effect we advise that you use **ABBAzol Hydrofuge** ou **ABBAzol Hydroléofuge**, please see booklet.

For brick walls, **ABBAstop Plus** limits the appearance of white traces which can be created by mortar's alkalinity.

### ▶ HOW TO APPLY

**ABBAstop Plus** must be applied to clean and dry surfaces with a spray, a brush, or a roll which are solvent resistant.

**ABBAstop Plus** must be applied generously in one thick coat and vertically from bottom to top.

If a prior treatment with **ABBAmousses** is carried out, **ABBAstop Plus** must be applied one to two weeks afterwards in order to let the prior treatment work in depth.

**ABBAstop Plus** must be applied onto clean surfaces.

Avoid projection on the surfaces which are not meant for treatment such as glass, metals, plastics... and protect them during the application.

In the case of accidental projection, wipe off quickly the product with a cloth or sponge and water.

### ▶ PACKAGING

- 2-litre bottle
- 10-litre bottle
- 25-litre drum
